

Kenzai JET Edge

Inkjet Printer for Edge Surface of Interior and Other Materials

Features

- Print on the edge surface of interior material at horizontal position.
- No complicate material handling (You can feed materials in a flat position)
- Direct printing gives you advantages such as no stock on hand and no pasting process is needed.

Direct Printing on Edge Surface
+ UV cure

Other Functions can be added on Your Request

- Automatic Head Cleaning
- Media Weight Max. 100kg
- Automatic Measurement of Media Thickness

Offer with Specialized Ink for Edge Surface Print

- Specialized ink for direct print on wood and edge band
 - It does not mean that all media can get good print quality with our recommended ink. Advance printing test is needed.
 - Physical properties test of ink must be done and judged by the customer.

Direct printing sample
